Subject: Data Viewer--Gold King Mine

George, please call me to discuss the data viewer for Gold King Mine. It would be helpful if we can quickly give Melissa a recommendation about making the public facing version of this ready for public launch. I thought you, George, could draft a paragraph for the launch to get things started. I know a lot of people in the Command think this is a high priority and I personally think the viewer is awesome and packed with tons of information, pictures, maps. It will have high impact as a media event, though, and we need PIOs to be ready. Melissa and Liz, it was used in Deepwater Horizon, other major events.

Can we pull this off today? Obviously it would need to go to Congressionals first. Let me know how I can help.
